Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	2 Marks

Data Flow Diagram

Create a Data Flow Diagram (DFD) to show how data moves through your system - between external entities, processes, and data stores. Use the symbol legend below as a guide.

DFD Symbol Legend

Symbol	Name	Description
	External Entity	A person, organization, or system outside the project that sends or receives data (e.g., Student, Educator, Administrator).
	Process	An activity that transforms incoming data into outgoing data (e.g., Analyze Voice, Generate Feedback).
	Data Store	A place where data is held for later use (e.g., User Database, Explanations, Results).
	Data Flow	The movement of data between entities, processes, and data stores, labeled with what data is being passed.

Example

The diagram below illustrates how the symbols above come together to form a complete data flow diagram.
