

Project Initialization and Planning Phase

Date	26 June 2026
Team ID	N/A
Project Name	Voice Based Concept Understanding Analyser
Maximum Marks	3 Marks

Define Problem Statements (Customer Problem Statement Template):

Create a problem statement to understand your customer's point of view. The Customer Problem Statement template helps you focus on what matters to create experiences people will love. A well-articulated customer problem statement allows you and your team to find the ideal solution for your customers' challenges. Throughout the process, you'll also be able to empathize with your customers, which helps you better understand how they perceive your product or service.

Example:

Brainstorming & Idea Listing - Voice Based Concept Understanding Analyser

I am	I'm trying to	But	Because	Which makes me feel
Students preparing for exams / interviews	Understand a concept better through voice explanation	Manual evaluation is time-consuming	Lack of AI tool that understands both meaning and speech	Unsure about my understanding
Educators / Teachers assessing students	Evaluate spoken answers quickly and objectively	Feedback is subjective and inconsistent	Existing tools focus on only transcription or only grammar	Less confident during exams / interviews
Online learners in self-paced courses	Get automatic feedback on conceptual clarity and mistakes	Hard to analyze both content and speech quality together	No real-time scoring on conceptual understanding	Difficult to identify areas to improve
Recruiters evaluating communication & concept clarity	Improve communication, fluency and confidence	No system to generate detailed reports and insights	Reports are not automated and actionable	Need a reliable AI assistant for objective feedback

Problem Statement (PS)	I am (Customer)	I'm trying to	But	Because	Which makes me feel
The current manual process of evaluating spoken conceptual explanations is slow, subjective, and inconsistent. Students and educators need an automated system that can check both conceptual understanding and speech quality to provide clear, fair, and reliable feedback.	A student or educator evaluating conceptual understanding	Assess how well a spoken explanation matches the expected concept	Manual evaluation is time-consuming, subjective, and inconsistent	There is no automated system that accurately analyzes both conceptual understanding and speech quality	Uncertain about the learner's actual understanding and communication skills
